# POTLURI KRISHNA PRIYATHAM

**Software Engineer • AI/ML/Data Practitioner • Quantum Computing Enthusiast**

## SUMMARY

Problem solver, software engineer and AI/ML/Data practitioner with ~2 years of industry experience across defence systems (BEL), enterprise mobile (Jio Platforms), and cloud-deployed ML applications. Skilled across full-stack development, data science, and quantum computing. Known for breaking down ambiguous requirements, identifying root causes, and delivering reliable solutions with hands-on cloud deployment, system design/architecture, and autonomous AI agent experience.

## SKILLS

**Quantum:** Qiskit, Cirq, QBraid, Azure Quantum
**Mathematics:** Linear Algebra, Probability, Numerical Methods, Advanced Calculus
**Languages:** Python, Java, C/C++, JavaScript, Swift, SQL, HTML/CSS
**Frameworks & ML:** Spring Boot, React, Flask, TensorFlow, PyTorch, Scikit-Learn, LangChain, OpenCV, Pandas, NumPy
**Cloud & Other Tools:** AWS, Azure, MySQL, MongoDB, PostgreSQL, Power BI, Git, Docker

## WORK EXPERIENCE

**Deputy Engineer | Bharat Electronics Limited (BEL)** *Jun 2025 – Mar 2026*

- Contributed to the AEW&C Maintenance Management System (Java Spring Boot, React, Python) by implementing key modules and proposing an OCR-based document ingestion flow to auto-fill forms and surface extracted fields — estimated to reduce manual data entry by ~68%.
- Engineered a high-reliability Ventilator System UI with Qt/QML meeting strict safety standards.
- Designed and engineered the VAAMS system architecture, defining key modules and integration points across software and hardware components.

**Software Intern | Jio Platforms Limited** *Aug 2022 – Jul 2023*

- Engineered 5+ major features and resolved 20+ critical bugs for the JioMeet macOS client, driving a 35% increase in app performance and significantly enhancing the end-to-end user experience for millions of users.
- Ensured platform stability and data continuity by upgrading to GA4 tracking and maintaining high-quality Swift/Objective-C codebases, resulting in a 99.9% session success rate across the platform.

**ML Intern | Indian Servers** *Jun 2021 – Aug 2021*

- Built and deployed IRIS flower classification ML model (Scikit-learn + Flask) on Azure App Service with 90% model accuracy.

## PROJECTS

**Own Agent — Personal AI Agent | LangChain, Gemini, Python** *github.com/kittupriyatham/OwnAgent*

- Autonomous agent executing system tasks, file operations, and real-time web research through a custom toolset.

**QiskitLearningJourney | Python, Qiskit, QBraid** *github.com/kittupriyatham/QiskitLearningJourney*

- Implemented 9 quantum circuits from scratch using a Problem-Based Learning approach: Bell & GHZ states, Superdense Coding, Quantum Half-Adder etc — architected to run on local simulators (Qiskit Aer), QBraid cloud, and future Azure Quantum / AWS Braket targets.

**BookCollectionManager | Spring Boot, PostgreSQL, React** *github.com/kittupriyatham/BookCollectionManager*

- Full-stack CRUD app with RESTful API backend and responsive React frontend for personal library management.

**ML-Model-Deployment | Scikit-learn, Flask, Azure App Service** *github.com/kittupriyatham/Machine-Learning-Model-Deployment*

- Deployed an Iris classification model as a Flask web app on Azure App Service — model achieved 90% accuracy on test data, packaged for production-style serving.

## EDUCATION

**B.Tech Computer Science & Engineering | KL Deemed to be University** *Aug 2019 – Apr 2023*

**PhD Computer Science & Engineering | SRM AP University** *Sept 2026 – 2029*

## CERTIFICATIONS

- WISER x AQV x Qubitech: Quantum Algorithms: Fundamentals & Hands-on Training — Phase 2 (2026)
- WISER x AQV x Qubitech: Quantum Fundamentals — Phase 1 (2026)
- Microsoft Certified: Azure Developer Associate (2022)
- Certified Entry-Level Python Programmer — OpenEDG (2022)
